

As a leader in **Business Process Intelligence**, SigmaFlow combines methodology and process management know-how, to provide you superior Knowledge Management, Continuous Improvement Project Management, and Best Practice Transfer. Thousands of process professionals at corporations such as EnCana Oil & Gas, First Data Corporation, Halliburton, Pratt & Whitney, Valspar, The World Bank, and Tyco, are deriving results from SigmaFlow Solutions today. *Founded in 2002, with over 200 customers and 20,000+ users.*

Solutions

Organizations are increasing revenues and reducing costs today, with SigmaFlow's combination of Consulting Services and Software Solutions for Business Process Intelligence.

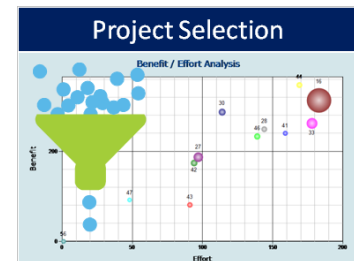

- **CREATE:** Accelerate results with proven, Template-based solutions.
- **PROPAGATE:** Once a program's process has been validated, the highest ROI opportunity is to **propagate** the proven successes to other locations, compounding the benefits, at minimal cost.
- **EVOLVE:** Continuously **Improve** and evolve these gains, by providing your people with process-centric Knowledge and Measurements.

Template-based Project Portfolio Management

Continuous Improvement **project success** is a function of Valuable Projects, Skilled Team-member, and Executive Commitment. SigmaFlow provides:

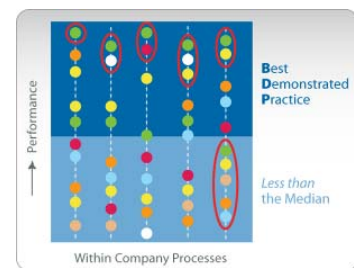

- **Project Selection** that enables **Identification** of Strategic Projects with the Highest ROI and Lowest Risk.
- Template-based Project Execution that enables **Team members** to Achieve Peak Performance, Sooner.
- **Executives** with 'Real' process improvement measurements.

Best Practice Transfer

Best Practice Transfer is the **highest known ROI improvement** opportunity... replicate improvements that have been validated within your company for a **fraction** of the original project cost. SigmaFlow provides:

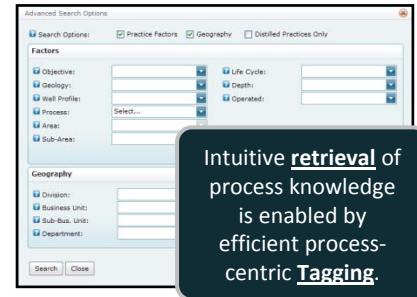

- **Identification** of strategic **Processes, Projects, and People Knowledge** you want transferred across your organization.
- **Distillation** of process **Success Factors**
- **Transferring** success factors across multiple locations
- **Sustaining** Transfer Gains by Scorecarding the process performance at each transfer location.

Business Process Standards & Compliance

You cannot **Control** what you don't **Measure**. SigmaFlow provides:

- **Business Process Standards & Compliance:** Minimize process risks by documenting verified procedures and validating that employees are following established standards.
- **Skills Management:** Combining Knowledge-Sharing with Skills Assessment improves process execution, and minimizes Knowledge decay.
- **Business Process Management:** Sustain & Evolve manual processes.

Capabilities

Capabilities	Features / Benefits
Process-centric Knowledge Management	“Less than 20% of the knowledge needed to perform a job is Documented.” (-APQC) Tremendous value can be unleashed by Capturing and Utilizing Knowledge. SigmaFlow provides Effective Knowledge Management : Process-centric content organization and context-tagging provides needed structure and expedites your knowledge retrieval.
Analysis-ready Metric Collection	Sustain and Evolve Core Business Processes, and Identify Best Practice Transfer opportunities.
Project Management Infrastructure	Project Selection, User Dashboard, Template-driven Roadmap, Workflows, Gate and Financial Reviews
Business Process Analysis Toolkit	Delivers end-user productivity, reduced errors and faster realization of results. No other enterprise-level solution integrates with the process improvement tools. (Tools include: Business Process Analysis, Process Improvement, Process Reengineering, Simulation, Lean, Six Sigma, Statistics.)
Business Process Templates	Provide the structured methodologies and tools to execute your projects consistently, and sustain the success. You can build your own template, or utilize an existing, proven template developed by SigmaFlow and its partners.
Employee Development & Skills Alignment	Provide a knowledge support infrastructure. Improve your process execution with alignment between Process, People and Skills.

Getting Started is Easy

Template-based Project Portfolio Management solution configuration takes less than a day, and no programming. An internet connection, browser and log-in are all that's needed. Our **SaaS** (Software as a Service) platform requires **no** capital investment in hardware, and is **scalable** from small project teams to global deployments. (Continuous Improvement projects typically deliver a **10 to 1** benefit-to-cost ratio.)

Best Practice Transfer Workshop provides hands-on Training of the Distillation and Transfer process for a critical business **Process, Project, or Human Tacit Knowledge**. Workshop provides: Successful Transfer result, Best Practice Transfer Training, and a **SaaS** (Software as a Service) Knowledge Portal instance. (Best Practice Transfer projects typically deliver a **50 to 1** benefit-to-cost ratio.)

Business Process Standards and Compliance Workshop demonstrates the ease of creating a process standard, validating the standard is being followed, and incorporates measurements feedback-loop. **SaaS** (Software as a Service) Knowledge Portal instance is provided.

NATIONAL ENVELOPE

“We needed a solution to help us leverage our organizational knowledge and transfer our Lean Six Sigma best practices across all of our facilities. SigmaFlow’s Best Practice Execution System aided us in exceeding expectations for a uniform, efficient, and effective transfer across the entire organization.”

John Schlich, Senior Vice President, National Envelope – The largest envelope manufacturer in the world.
